Product: **Benzene Sulfonyl Chloride**

Benzene Sulfonyl chloride is an organic sulfur compound. It appears as a colorless viscous liquid, soluble in organic solvents, and easily hydrolyzed.

Alias: Benzenesulfonyl chloride; Benzenesulfonyl chloride; BSC; 4-Benzenesulfonic acid chloride

CAS No: 98-09-9

Molecule structure

Specifications:

Appearance: Light yellow to colorless clear liquid

Purity (GC): 99.00%min

Diphenylsulfone: 0.10% max

Free acid: 0.20% max

Packing & Delivery 250kg/drum, 20Mt/FCL

UN No.2225, Class.8, Packing group:III

Application

☒ A sulfonating reagent commonly used to prepare sulfonamides, sulfonated esters, and sulfones

☒ Intermediates of pesticide; Dye; medicine

☒ Used for the manufacture of color base of ice dye

☒ Reagents used to test colloids
