

Items	Units	Standards
R-body content	% ≥	96
R-body ratio	% ≥	99
Water content	% ≤	0.3
Acetone incompatibility	% ≤	0.2
Chemical name	R-2 - [4 - (5-chloro-3-fluoro-2-pyridyloxy) - phenoxy] - propargyl propionate	
Abbreviation	Clodinafop-propargyl	
Molecular formula	C <sub>17</sub> H <sub>13</sub> ClFNO <sub>4</sub>	

Structural formula	
Molecular weight	349.740823
CAS code	105512-06-9
Einces No.	600-662-6
Risk level	6.1
Appearance	Light yellow / off white
Features	Sliced
Recommended use	It is mainly used to control weeds in wheat field, and has control effect on annual gramineous weeds, such as wild oats, <i>Lolium aestivum</i> , durum grass, and <i>Lolium</i> .
Packing	25kg bags / 25kg cardboard barrels
